## **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

## In the Specification

Page 1: line 19, "enter" has been changed to – enters --.

Page 4: line 6, after ";", -- and – has been inserted.

Page 6: line 26, "22" has been replaced with - 21 --.

## In the Claims

In claim 2: line 3, after "surface", -- . –(period) has been inserted.

In claim 3: line 6, after "surface", -- and the second emitting/receiving surface – has been inserted. See claim 7 for comparison.

## REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Best reference noted is Shirai et al. This reference teaches a similar assembly of beam splitters but fails to teach or fairly suggest the fourth emitting/receiving surface of the assembly. More importantly, it fails to teach or remotely suggest the coaxial characteristic of the optical axes of beams of respective first, second and third wavelengths of the present invention. Therefore, the present invention distinguishes over Shirai et al.
